HOG AND PIG FINAL ESTIMATES

USDA's National Agricultural Statistics Service has published final estimates for Hogs and Pigs, including revisions made by the Agricultural Statistics Board (ASB), for the production years 2013 through 2017. Inventory, market hogs, breeding herd, and pig crops were published during calendar years 2013-2017 in periodic ASB reports. Data included in this publication provide a historic record and a benchmark for current estimates.

Revisions were made after a thorough review of the original survey data and all additional data now available, including the 2017 Census of Agriculture. Other data series considered included slaughter data, shipment records, imports, and exports. Inventory levels, pig crops, and their relationship to slaughter were compared to historic totals. The 2013-2017 estimates are considered final and will not be revised again.

For a full copy of the *Hogs and Pigs Final Estimates 2013-2017* report please visit www.nass.usda.gov. For state specific questions please contact:
